### Particularities

- The use of new grapes like the Caladoc or the Marselan
- Often rewarded by Robert Parker

Situated on the former bed of the Rhône Valley, is the enclosed field of Le Clos Saint Michel with its twirled vine stocks on a full bed of blond rounded pebbles. Franck and Olivier Mousset represents the fourth generation. They are young and they know how to combine natural richness of the soil, traditional skills and the most recent scientific insight. They wanted to recreate a traditional craftsmanship in winery based on a limit production with a high wine concentration and also using the most recent techniques in cultivation and winemaking in a reasoned method.
